- If the total is between \$10,000 and \$25,000 use GSA Level 1 Price (multiply unit List Price by 0.4499 to calculate net price per unit)
- If the total is between \$25,001 and \$50,000 use GSA Level 2 Price (multiply unit List Price by 0.4381 to calculate net price per unit)

**Example:** 25x VA1818L

**Determine Discount Level:** 25 x \$589.57 [GSA Net Price] = \$14,739.25 - Use GSA Level 1 Discount (between \$10,000 - \$25,000)

**Determine Net Price:** \$1,245 [List Price] x .4499 [GSA Level 1 Discount Factor] = \$560.13 Net Price Per Unit

Ships via common carrier.

Each KASTA unit includes 2 standard labels (text or icon labels), if desired.

Use model GNG-MAG-2XL ganging magnets to gang KASTA units together. For each point of contact between adjacent units being ganged together, a quantity of 1x GNG-MAG-2XL is required. For example, ganging 3x KASTA units together would require a quantity of 2x GNG-MAG-2XL.

Place ganging magnets on the inside steel walls of each adjacent unit by removing the internal liners. Position the units together with magnets facing each other to create the greatest pull.

Sample chips available.

## ADDITIONAL NOTES

Ships via common carrier.

SOTARE half elliptical units receive two labels per unit. SOTARE quarter elliptical units receive one label per unit.

SOTARE units can also be configured with our Valuta family of receptacles.

Use magnets (model GNG-MAG-2; containing 2 magnets) to gang VALUTA/SOTARE units together. For each point of contact between adjacent units being ganged together, 2 magnets are required. For example, ganging 2 SOTARE units together would require 1 pair of ganging magnets.

Place ganging magnets on the inside steel walls of each adjacent unit by removing the internal liners. Position the units together with magnets facing each other to create the greatest pull.

Sample paint chips available.

Use magnets (model GNG-MAG-2; containing 2 magnets) to gang VALUTA/SOTARE units together. For each point of contact between adjacent units being ganged together, 2 magnets are required. For example, ganging 3 VALUTA units together would require 2 pairs of ganging magnets.

Place ganging magnets on the inside steel walls of each adjacent unit by removing the internal liners. Position the units together with magnets facing each other to create the greatest pull.

VALUTA units can also be configured with our SOTARE family of receptacles.

VALUTA Secure models have a narrower 1/2" wide paper opening with a locking lid for secure document disposal.

VALUTA/SOTARE signage is angled to allow full range of motion for the hinged top opening.

VALUTA LAMINATE signage is straight. A threaded bolt (to secure signage) is added to the back of the unit upon assembly when a unit is ordered with signage.

The Sign Holder is made of painted steel and is secured to the receptacle. There are two unique offerings:

1. Painted Steel Sign Holder with MG Magnetic Graphics (SIGN-MAG-R/P)—The 8" x 12" graphic is applied directly to the painted steel sign holder, leaving no painted steel exposed. This graphic can be either removable (magnetic) or permanent (adhesive backing).
2. Painted Steel Sign Holder with Acrylic Front and Customer Created Graphic Insert (SIGN-ACR)—A removable acrylic cover allows for the use of custom signage using 8 1/2" x 11" sized media (or smaller.) This flexible option provides the ability for customer designed & produced signage.

VALUTA Planter's fully enclosed watertight internal liner depths are as follows: VA1809L-JR: 6"; VA1809L: 6"; VA1814L: 8" VA1818L: 12".

Planters include a 14 1/2" x 26 1/2" polybag(s) that can be filled with sand to add ballast if internal additional weight at the base of the unit is desired for stability. Filling the polybag half full of sand will add approximately 25 pounds of weight to the base.

Use magnets (model GNG-MAG-2; containing 2 magnets) to gang VALUTA/SOTARE units together. For each point of contact between adjacent units being ganged together, 2 magnets are required. For example, ganging 3 VALUTA units together would require 2 pairs of ganging magnets.

Place ganging magnets on the inside steel walls of each adjacent unit by removing the internal liners. Position the units together with magnets facing each other to create the greatest pull.

VALUTA units can also be configured with our SOTARE family of receptacles.

Sample chips available.

Magnuson Group does not sell hand sanitizer dispensers.

HAANDER's free standing and wall-mounted models are designed to work with a wide variety of 3rd party hand sanitizer dispenser units [both touch free and push style models]. Any dispenser that fits within 7 3/4" wide by 14" high is compatible and can be most easily mounted using double sided adhesive tape, which is often included with the dispenser.

HAANDER's mounting holes align with many PURELL® Push-Style Dispensers (NXT, ES4, FMX) and PURELL® Touch-Free Dispensers (TFX, LTX, ES6 & ES8), making installation easy. ©2015. GOJO Industries, Inc. All rights reserved.

HAANDER-W: Mounts to the wall with 4 screws. Dispensers are mounted to HAANDER-W using either double sided adhesive tape (often included with dispenser) or with hardware. If the dispenser is a compatible PURELL® product, mounting holes are aligned for easy installation with hardware.

HAANDER-F: Painted steel dispenser housing mounts to post with hardware provided. Dispensers are mounted to painted steel housing using either double sided adhesive tape (often included with dispenser) or with hardware if the dispenser is a compatible PURELL® product. Mounting the dispenser to the painted steel housing with hardware is not possible unless the dispenser is a compatible PURELL® product. The painted steel base is 1/4" high off the ground.

HAANDER-W includes 4 drywall screws and 4 wall anchors to mount HAANDER-W to drywall. For other applications, customer will need to supply their own hardware.

HAANDER-F includes all hardware to mount the dispenser housing to the freestanding post and base.
